Fin dai primi del '900, la ricca borghesia viaggiava su piroscafi e treni, con i bauli che erano attrezzati con diversi scompartimenti dedicati allo stivaggio degli indumenti, arricchiti da particolari in ottone come chiusure cerniere con ruote per la possibilità di spostarlo agilmente. Nel 21° secolo sono tornati alla moda, non più per viaggiare ma bensì come elemento di arredamento.

Il baule per gli uomini. Abbiamo pensato di realizzare un bar con la possibilità di inserire un refrigeratore con un cassetto per alloggiare sigari e porta bicchieri e una luce led per aiutare alla preparazione del drink, dettagli e cerniere in ottone. Rivestito interamente in cuoietto e ecopelle per una facile pulizia.

Struttura in legno multistrato con interno in pelle sintetica e esterno in cuoietto P3 o pelle P2.

Particolari in cuoietto P3.

Base su ruote.

Alloggiamento per un mini frigo.

Portabottiglie, cassetto e contenitori a tasca.

Cerniere e lucchetti in ottone.

Mini frigo escluso.

Since the early 1900s, the rich bourgeoisie traveled on steamboats and trains, with trunks that were equipped with different compartments dedicated to the stowage of clothing, enriched with brass details such as hinges with wheels for the ability to move it easily. In the 21st century they returned to fashion, not to travel but rather as a piece of furniture.

A trunk for men. Our idea was creating a bar with the possibility of inserting a chiller and a drawer to accommodate cigars and glass holders and a led light to assist with the preparation of the drinks, and added brass details and hinges. It's fully covered in leather and faux leather for easy cleaning.

Structure in plywood covered in synthetic leather (internal part) and thick leather P3 or leather P2 (external part).

Details in thick leather P3.

Base on wheels.

Compartment for a mini-fridge.

Bottle holder, drawer and containers with pockets.

Hinges and lockers in brass.

Mini fridge excluded.
