

laki

Laki è quasi un "objet trouvée", nato da una felice trovata: unire un vassoio in acciaio e una struttura in tubo, ricavandone un servomuto molto leggero da utilizzare con grande libertà in casa.

La forma data alla struttura permette la massima versatilità d'uso, consentendo anche l'appoggio a ridosso del divano, per una più comoda fruizione.

Un disco in cuoio, come un grande sottobicchiere, attutisce l'appoggio degli oggetti sul metallo.

A terra, lungo la mezzaluna della base, corre una stringa di cuoio avvolta a spirale, che ammorbidisce l'appoggio della struttura sul pavimento e protegge entrambi.

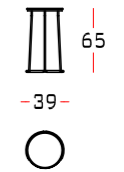

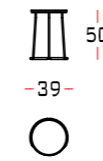

Laki is almost an "objet trouvée", which came from a great find: joining a steel tray and a tube structure, obtaining a very light valet stand to use with great freedom at home. The shape given to the structure allows maximum versatility of use, allowing the support behind the sofa, for a more comfortable use.

A leather disc, like a large coaster, muffles the setting down of objects on the metal surface.

On the ground, on the half moon of the base, a leather string wrapped in a spiral runs along, softening the framework's placement on the floor while protecting both.

Struttura in metallo verniciato.
Piano in cuoietto P3.
Piede rivestito con stringa di cuoio..

Structure in painted metal.
Top in thick leather P3.
Foot covered with cowhide string.
