

# isola

Divano a elementi modulari, componibili, aggregabili, liberi.

Oltre all'elemento più tradizionale, di profondità standard, ci sono elementi di diversa profondità e "geografia": come l'angolare, (quasi un day-bed) e la penisola a "Y".

Sono conformazioni diverse, che permettono di uscire dalla disposizione più abituale della zona relax, per creare isole e penisole che disegnano un paesaggio nuovo, tagliato su misura per rispondere a esigenze diverse.

Il cuoio incornicia il prodotto con dettagli: la base del divano è quasi un vassoio su cui si posano le parti imbottite e rivestite in tessuto.

Sofa with modular elements, modular, aggregatable, free.

In addition to the more traditional element, of standard depth, there are elements of different depth and "geography": such as the angular, (almost a day-bed) and the "Y" peninsula.

They are different conformations, which allow you to leave the most usual arrangement of the relaxation area, to create islands and peninsulas that draw a new landscape, tailored to meet different needs.

The leather frames the product with details: the base of the sofa is almost a tray on which the upholstered and fabric-covered parts rest.

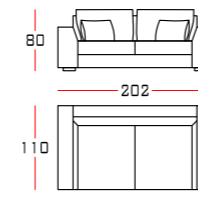

Struttura in legno multistrato e massello con molleggio seduta su cinghie elastiche. Imbottitura in poliuretano espanso a quote differenziate.

Rivestimenti cuscini in tessuto o pelle. Zoccolo con fasce in cuoietto P3.

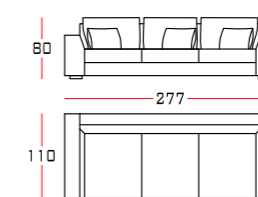

Structure in solid wood and plywood with suspension seat on elastic belts.

Padding in polyurethane foams with different densities.

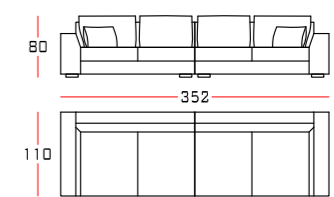

Cushion upholstery in fabric or leather. Bottom profiles in thick leather P3.
