

paloalto

Paloalto è una libreria autoportante che si regge intorno, appunto, al suo "palo". Il montante di Paloalto infatti fa da pennone, si fissa in estensione tra pavimento e soffitto e crea il fulcro attorno al quale possono essere disposte fino a 4 serie di ripiani: una serie su ogni faccia del montante.

In questo modo, e grazie a un montaggio di estrema semplicità, possono essere ottenute configurazioni lineari, o ad angolo, o a croce.

Paloalto è un modo nuovo di intendere la libreria: non solo uno scaffale, ma un sistema per creare divisioni diaframmate.

Struttura montanti verticali da pavimento a soffitto in legno massello di frassino tinto; puntali livellatori regolabili in ottone.

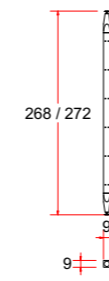

Ripiani in legno multistrato e fibra di legno, rivestito in cuoietto P3 e pelle P2; piedini livellatori regolabili in ottone.

Paloalto is a self-supporting bookcase that stands around its "pole". The Paloalto pillar acts as a flagpole, it is fixed in extension between floor and ceiling and creates the fulcrum around which up to 4 series of shelves can be arranged: one series on each side of the pillar.

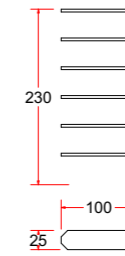

In this way, and thanks to an extremely simple installation, linear, angled or cross configurations can be obtained. Paloalto is a new way of conceiving a library: not just a shelf, but a whole system that allows you to create diaphragmatic divisions.

Vertical upright structure from floor to ceiling in solid stained ash wood; adjustable brass levelling ferrules.

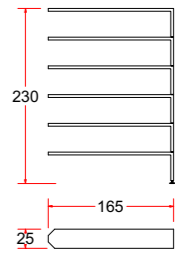

Shelves in plywood and wood fiber, covered in thick leather P3 and leather P2; adjustable levelling feet in brass.
