

trevi

Le forme arrotondate di Trevi ricordano gli anni '50, epoca d'oro del design italiano. In realtà, la spinta iniziale è stata la voglia di uscire dai soliti modelli costruttivi in cui il logico assemblaggio di base, spalle e top detta legge e conduce forzatamente alle solite forme squadrate.

Trevi è nata proprio dalla voglia di uscire da questo limite formale: un compensato curvato realizzato in esclusiva unisce in un continuo la parte orizzontale e quella verticale del mobile. La giunzione si sposta altrove, i fianchi sono liberi dalla perpendicolarità...

Il mobile senza spigoli, per eccellenza. Forme reinventate per andare oltre i soliti clichè.

Anche nelle finiture.

The rounded shapes of Trevi are reminiscent of the '50s, the golden age of Italian design. In fact, the initial thrust was the desire to get away from the usual construction models in which the logical basic assembly, shoulders and top, dictates the law and leads forcibly to the usual square shapes.

Trevi was born from the desire to get out of this formal limit: a curved plywood exclusively crafted combines the horizontal and vertical part of the furniture. The junction moves elsewhere, the sides are free from perpendicularity...

The furniture without edges, par excellence. Shapes are reinvented to go beyond the usual clichés. In the finishing touches too.

Struttura in legno multistrato con finitura in essenza.

Top e base finiti in pelle P3, P2, P1.

Piedini in metallo verniciato.

Structure in plywood finished with wood essence.

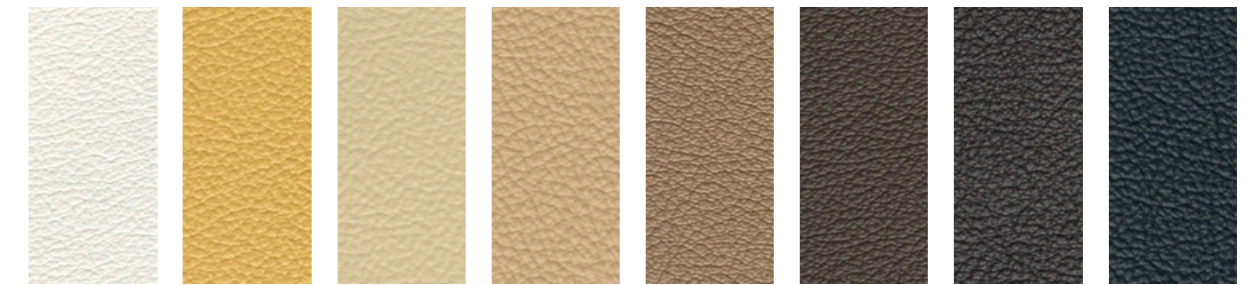

Top and base finished with leather P3, P2, P1.

Feet in painted metal.
