

victoria

Contenitore bifronte, in cui una struttura verticale in essenza di legno fa da supporto a un top che, come un mezzo guscio, si innalza da terra e si posa sopra la struttura.

Uscire dalle logiche abituali di contenitori strutturati con "top-spalle-ecc", senza giunti angolari, un'ala morbida che il cuoio riveste con grande efficacia.

Il gioco di contrasti si esprime anche nel contrasto tra la morbida uniformità del cuoio e la ricca personalità delle venature del legno, in essenze scelte privilegiando la forza espressiva delle texture più naturali.

Two-faced container, in which a vertical structure in wood essence supports a top that, like a half shell, rises from the ground and sits above the structure.

Outside the usual logic of containers with "top-shoulders-etc" concepts, with no angular joints, and a soft wing that is covered by leather with great effectiveness.

This play of contrasts is also expressed in the opposition between the soft uniformity of leather and the rich personality of wood veins, in selected equalities favoring the expressive strength of the most natural textures.

Struttura in legno multistrato.
Top rivestito in cuoietto P3 o pelle P2.
Base con finitura in essenza.
Bordatura e parte interna rivestite in pelle P2.

Structure in plywood.
Top covered in thick leather P3 or leather P2.
Base finished with wood essence.
Edgings and internal parts are covered in leather P2.
