

Laicon è un tavolo in cui la struttura è ritagliata da un unico pannello in legno multistrato. Il profilo di questa struttura è poi rivestito in cuoietto che nasconde tutte le giunzioni tecniche. Il risultato è una struttura aerea. La finitura in cuoietto è funzionale al progetto stesso del tavolo: aumenta la qualità del piano con le sue caratteristiche tattili ed estetiche e rappresenta la capacità aziendale di lavorare il pellame con finiture di selleria.

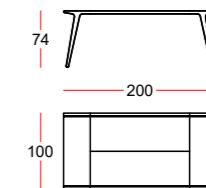

Struttura in legno massello di frassino tinto in essenza.
Top e bordature in legno o cuoietto P3.
Profili in ottone bronizzato.

Laicon's structure is cut from a single multilayered plywood panel. The profile of this structure is then covered in thick leather that hides all the technical joints. The result is an aerial structure. The thick leather finish is functional to the design of the table itself: it increases the quality of the top with its tactile and aesthetic characteristics and represents the company's ability to work leather with upholstery finishes.

Structure in solid ash wood stained in essence.
Top and edgings covered in wood or thick leather P3.
Profiles in bronzed brass.
