

roma

Roma è un tavolo a basamento centrale dal design scultoreo ed elegante, che unisce solidità e leggerezza in un'unica forma armoniosa. La base, caratterizzata da linee curve e fluide, è pensata per offrire massima libertà d'uso, garantendo comfort e accessibilità da ogni lato. La struttura in fibra di legno è completamente rivestita in pelle, con tagli sartoriali che seguono con precisione le curve del modello, come un abito su misura. Il piano in legno presenta un raffinato intarsio a raggiera dell'essenza, mentre nelle versioni tonde di dimensioni maggiori è arricchito da un inserto centrale in specchio fumé, che aggiunge profondità e ricercatezza alla composizione.

Roma is a central-base table with a sculptural, elegant design that combines solidity and lightness in a harmonious form. The base, defined by its smooth, flowing curves, is designed to offer maximum usability, ensuring comfort and accessibility from all sides. The wood fiber structure is entirely upholstered in leather, with tailored cuts that precisely follow the model's curves, like a made-to-measure garment. The wooden top features a refined radial wood grain inlay, while the larger round versions are enhanced by a central insert in smoked mirror glass, adding depth and sophistication to the overall composition.
