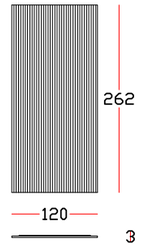
cortina



Sistemi di chiusure (ante/porte) da quantificare su progetto | Locking systems (doors) to be quantified on project.

Cortina trasforma la parete in una pelle viva, una superficie vibrante che cattura lo sguardo e ridefinisce i confini dell'abitare. Non è un semplice rivestimento, ma uno spartito visivo dove la materia si anima attraverso un ritmo infinito di luci e ombre.

Il cuore del progetto è il motivo rigato in rilievo: una sequenza ipnotica di fresature che eleva lo spazio, donando una profondità tattile e una maestosità senza tempo. Grazie alla precisione millimetrica della lavorazione CNC, ogni giunzione scompare, svelando una superficie monolitica e ininterrotta. Cortina è l'architettura che si fa emozione.

Cortina transforms the wall into a living skin, a vibrant surface that captures the gaze and redefines the boundaries of living. It is not a mere covering, but a visual score where matter comes alive through an infinite rhythm of light and shadow.

At the heart of the project lies the ribbed relief pattern: a hypnotic sequence of millings that elevates the space, bestowing tactile depth and a timeless majesty. Thanks to the millimetric precision of CNC craftsmanship, every joint vanishes, revealing a seamless and monolithic surface. Cortina is architecture transformed into emotion.

Pannelli in fibra di legno lavorati a scanalature verticali, rivestiti in similpelle.

Medium-density fibreboard panels with vertical grooves, covered in synthetic leather.
